

BASIC CAPACITIES:
800 to 3000 kg

LIFTING HEIGHTS:
1500 to 7000 mm

Electric-Multidirectional Sideloader

»» Compact, robust, flexible and manoeuvrable

The MS/MDS series is a universal sideloader with multidirectional steering for the handling of pallets and long loads in the most confined areas. These trucks are particularly suitable for the use in narrow unguided aisles e.g. do-it-yourself stores, window fabricators and other applications where a low cost versatile truck is required.

This truck is characterized by his compact and sturdy design as well as excellent quality. A main feature is the design of the carriage and wheels enabling its use both indoors and outside on suitable surfaces.

»» Steering

Multidirectional steering for optimum manoeuvrability:

• LENGTHWISE DRIVE

In **lengthwise drive** the Genkinger-HUBTEX MS/MDS can quickly transport long material through narrow doorways and aisles.

• CROSSWISE DRIVE

In **crosswise drive** the truck can be used as conventional frontloader.

• CIRCLE DRIVE

Circle drive (360°) enables a fast turning of the truck without having to manoeuvre.

• DIAGONAL DRIVE

Diagonal drive ensures optimal positioning accuracy for loading and unloading particularly with long loads in freerange aisles.

With cabin

- safe
- ergonomic
- optimal all round vision

»» Tiller arm (MDS)

All main driving and hydraulic functions, such as lift and lower, mast reach, fork tilt and fork adjustment are controlled via hand lever control valves (only available for MDS).

»» The Electric-Multidirectional Sideloader MS/MDS at a glance

TYPE	CAPACITY	LIFT HEIGHT	MAST REACH
MS/MDS 08	800 kg	up to 5500 mm	1300 mm (NB 1200)
MS/MDS 12	1200 kg	up to 5500 mm	1300 mm (NB 1200)
MS/MDS 16	1600 kg	up to 5500 mm	1300 mm (NB 1200)
MS/MDS 20	2000 kg	up to 7000 mm	1300 mm (NB 1200)
MS/MDS 25	2500 kg	up to 7000 mm	1300 mm (NB 1200)
MS/MDS 30	3000 kg	up to 7000 mm	1300 mm (NB 1200)

» Features and advantages

- Extremely low loadbed height (375 mm) gives improved utilization of warehouse height
- Load bed / Fork length from 800-1400 mm
- Mast reach / retract as a standard feature
- Reduced aisle width with optional roller guidance
- Fast cycle times are achieved with powerful three-phase AC drive technology and powerful hydraulic motors
- Minimum aisle width due to a narrow back frame design
- Strong, stable lift masts are manufactured "in house"
- Low operating costs with latest 48 V AC technology for pumps and drive motor as well as the use of high quality components throughout
- Drawbar for short distance operations (MDS) or with driver's stand-up cabin for longer distances (MS)
- Load wheels Vulkollan (PU), drive wheel Elastic (EL), optionally Vulkollan (PU)

»» Operating elements

All operating elements are designed ergonomically.
Single lever touch sensitive control of the hydraulic functions.

HUBTEX.

»» We solve handling problems in many industrial sectors all over the world

We are a dynamic medium-sized company with flat hierarchies and short decision-making paths. Our products are used worldwide. Customer orientation, individual solutions, quality and reliability – that's what Genkinger-HUBTEX has stood for for almost 90 years. We meet the technical requirements of our customers in a competent and flexible manner.

Our product range can be placed into 3 industrial sectors:

- Warehouse technology for industry and trade with a loading capacity between 0.3 and 20 tonnes.
- Lifting and transport equipment for weaving mills and warp knitting.
- Special solutions, lifting masts and components for driverless transport systems.

»» Product portfolio

» Modular system

Pedestrian-controlled truck

Driver-seated truck

Stand-up truck

» Standard range of products

- Hand pallet trucks, elevating platforms
- High-lift trucks with drum handling, gripping or swivelling device
- Electric low-lift trucks
- High-lift trucks
- Counterbalance pedestrian lift trucks
- Tractors, drive units
- Order pickers
- Long load, fourway and multi-directional sideloaders

» Special solutions

- Tool change cars
- Charging trolleys
- Roll handling
- Heavy duty transport equipment
- Fixed lifting frames

Let us know your requirements.
Genkinger-HUBTEX has the solution for your handling problem.

» Second hand, rental and leased equipment

Rental/leasing is the trend.
Flexibility becomes the sign of our time.
Many practical and financial reasons speak in favour of the use of rental or leased equipment.
Please do not hesitate to call us. We will be pleased to advise you.
